The market growth is primarily driven by increasing demand of higher productivity. The increasing trend of using the technology and reducing the reliance on paperwork and documentation is the major factor driving the market growth. The various benefits of the CPQ software like providing speed to the configuration and pricing process, reduction of the cost of demonstration, management of the legacy system integration and to remove the pricing data variation are the factors attracting more consumers towards implementation of the software in the industries, which is expected to drive the market growth in the future. Lack of awareness among the end-user is also one of the factors restraining the growth of the Configure price and quote (CPQ) software market.

The regional analysis of CNC Milling Machines market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World.
