## **Abstracts**

Global Connected Healthcare Market is valued approximately USD 17.91 Billion in 2021 and is anticipated to grow with a healthy growth rate of more than 25.01% over the forecast period 2022-2028. Connected healthcare is a management system that provides healthcare solutions that are customized as per the need of the customer. It provides personalized healthcare services remotely using digital data management system. Rising customized healthcare, increasing utility of mobile phones and wearable devices and rising adoption of digital platforms has driven the connected healthcare market. For instance: As per the Asia Pacific Personalized Healthcare Index 2021 China, which scored lower overall, performed well in the category of personalized technologies due to its uptake of wearable devices that can be used to monitor a person's health metrics, demonstrating that it is willing to adopt and actively use emerging technologies that support personalized care. Also, partnership among major key players is most likely to boost the overall growth of the global connected healthcare market. However, high initial investment cost and limited technologies available can obstruct the market's expansion over the projection period of 2022-2028.
