Global Construction & Demolition Waste Market is valued approximately USD 25.26 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.3% over the forecast period 2021-2027. Construction & demolition waste is produced during the construction of new infrastructures as well as the maintenance and demolition of existing infrastructures such as buildings, bridges, and roads. The key factor driving the demand for construction & demolition waste market is growing construction and renovation activities globally. According to ice.org.uk, global construction market is expected to reach USD 8 trillion by 2030. Also, government initiatives and policies regarding the recycling of construction & demolition waste are driving the global construction and demolition waste market forward. As per epa.gov, 600 million tons of construction & demolition waste was generated in the U.S. in 2018.
