Abstracts

Global Contract Logistics Market is valued approximately at USD 190 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 3.7% over the forecast period 2021-2027. Contract logistics is the outsourcing of service management tasks to a third-party logistics company, these procedures can include operations ranging from designing facilities, transporting and distributing goods to designing and planning supply chains as well as manufacturers. Increasing volume of business such as manufacturing and retails products, growing online trade and supply chain industry and increasing transparency in logistics. These are the factors which are driving the market.

Furthermore, use of robotics and automated drones in logistics with advancement in AI technology will anticipate the growth of market in forecasted period. For Instance: According to the UN's trade and development body (UNCTAD) report published in 2020, in year 2018 the worldwide sales by online business was 24.4 USD trillion, that was equivalent to 30% of the world GDP. The market for B2B online trade was 21 USD trillion and for B2C was 4.4 USD trillion in same year. This growth was due to rising online customers and increase in supply chains. Also, there was 1.4 billion customers in 2018 who shopped online. However, high cost of logistics and less manufacturer control may impede market growth over the forecast period of 2021-2027.
