Abstracts

Global COPD and Asthma Devices Market is valued approximately at USD 36.9 billion in 2019 and is anticipated to grow with a growth rate of more than 4.3% over the forecast period 2020-2027. Chronic obstructive pulmonary disease (COPD) and asthma devices are permanent treatment or rescue therapy for respiratory diseases. The COPD and asthma are the respiratory diseases that cause difficulty in breathing and a blockage in the airways of the lungs because of the inflammation, mucus production, and tightening of muscles. The daily exposure to environmental pollution, portability of the drug delivery devices, rising population of active smokers and increasing government initiatives for COPD and Asthma Devices are the few factors responsible for growth of the market over the forecast period. For instance: according to the Forum of International Respiratory Societies (FIRS), around 384 million people suffer from chronic obstructive pulmonary disease (COPD) and 3 million die from it each year, thus making it the third leading cause of death worldwide. Moreover, increase in prevalence of respiratory diseases such as COPD, asthma, and emphysema, rise in need for rescue medication during sudden asthmatic attack and government initiatives towards the spread of awareness for COPD and asthma symptoms will create a lucrative demand for this market. Whereas, increase in price competition and deterioration of material quality and overall high cost of asthma treatment is a challenge for the patients is the major factor restraining the growth of global COPD and Asthma Devices market during the forecast period.

The regional analysis of global COPD and Asthma Devices market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world owing to the widespread and early adoption of inhalers & nebulizers and large pool of patients suffering from respiratory diseases. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027.
