Abstracts

Global Corneal Implants Market is valued approximately USD 392 million in 2021 and is anticipated to grow with a healthy growth rate of more than 6.2% over the forecast period 2022-2028.

A plastic ring is surgically inserted into the middle layer of your cornea during a technique called corneal ring implantation. One may be able to see properly once this fixes some corneal issues. The cornea is the surface of eye's front and is covered by a transparent covering. Increasing prevalence of corneal disorders and rising awareness about the importance of organ donation are factors that are accelerating the global market demand. For instance, According to National Library of Medicine, every year around 200,000 corneal implant procedures are being performed annually. Also, according to the Cancer Research Foundation of America one in five people with keratoconus advance to the point that a corneal implant is required to restore normal vision,. The availability of FDA-approved corneal implants and the introduction of sophisticated corneal implant procedures like Deep Anterior Lamellar Keratoplasty (DALK) are also anticipated to accelerate the growth of this market during the forecast period. Also, increasing awareness about the availability of the artificial cornea are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, a lack of skills & expertise, and availability of various alternatives

methods of treatment impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Corneal Implants Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the presence of key market players, favorable reimbursement policies, as well as increasing research and development activities related to corneal implants are the factors expected to drive the region's growth further.. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028 owing to the presence of number of emerging markets players as well as highly clinical needs in developing countries, such as China, Philippines, and Indonesia, are expected to drive the region's growth.
