Abstracts

Global Corporate Lending Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028.

The Corporate Lending refers to type of lending in which Banks and Non-banking financial companies offers debt-based finance to corporate organizations. This funding is provided to cover capital expenditure as well as to cover operational costs. Banks and Financial Institutions offer finance through different lending products such as Term loans, Line of Credit, Working Capital loans, Venture loans, Real estate loans, Equipment loans and Loan against future lease rentals among others. The rising penetration of digital lending platforms and increasing inclination towards maintaining ownership of the business as well as recent Strategic initiatives from leading market players are factors that are accelerating the global market demand. For instance, according to Statista – in 2019, the digital lending market in India valued at USD 110 billion, and the digital lending market is projected to grow to USD 350 billion by 2023. Moreover, leading market players are working towards launch of innovative co-lending and digital lending platforms. For instance, in April 2022, Square launched Square Loans in Canada. This new loan product is intended for Small Businesses. In addition, in May 2022, Bank of Baroda announced the launch of an end-to-end digital platform to facilitate co-lending of loans in partnership with NBFCs. Through this new portal the company would offer co-lending loans to MSMEs, and retail customers. Also, growing need for finance among Small & Medium Enterprises coupled with increasing number of

co-lending collaboration between Banks & NBFCs are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, rising concern over loan defaults and increasing rate of interest impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Corporate Lending Mmarket study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the presence of leading market players and increasing number of corporate lending activities in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as the thriving growth of startups and increasing number of co-lending platforms, would create lucrative growth prospects for the Corporate Lending Mmarket across the Asia Pacific region.
