Abstracts

Global Corrosion Protection Polymer Coating Market is valued approximately at USD XXX billion in 2018 and is anticipated to grow with a healthy growth rate of more than XXX% over the forecast period 2019-2026. The corrosion of metallic and metals surfaces continues to be a constant problem for industries around the world. Manufacturing and transportation of products in almost each industrial vertical has shifted quickly, registering a better existence of chemicals factoring such as corruptions. Enterprises are increasingly adopting effective and innovating corrosion control methods, where polymer coating is an integral offering. High resistance alongside chemical corrosion and abrasion remains to impel the demand for corrosion protection polymer coatings. Moreover, the growth of oil & gas industry, along with the increasing demand of polyurethane are the few factors responsible for high CAGR of the market over the forecast period. According to International Energy Agency (IEA), the daily demand for crude oil around the world is expected to reach to almost 100.6 million barrels to 2019 from 96.2 million barrels in 2016. Similarly, as per the Independent Petroleum Association of America, the United States Export of Liquid Natural Gas (LNG) was 3.6 trillion cubic feet (tcf) in 2018 and is expected to reach over 4 tcf till 2024. This, in turns, is expected to accelerate the growth of Corrosion Protection Polymer Coating market around the world. However, stringent regulations imposed by environmental protection agencies on manufacturing of toxic products is one of the major factors expected to hamper the growth of global Corrosion Protection Polymer

Coating market over the forecast period.

The regional analysis of global Corrosion Protection Polymer Coating Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the leading/significant region across the world in terms of market share owing to the rising number of oil & gas exploration sites in the region. However, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period of 2019-2026.
