Global Corrosion Under Insulation (CUI) & Spray-on Insulation (SOI) Coatings Market is valued approximately USD 1.8 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.5% over the forecast period 2022-2028. Corrosion protection coatings, such as CUI and SOI coating, are used in the oil and gas and industrial sectors to safeguard pipelines, equipment, reactors, and storage tanks. These industries use toxic and corrosive chemicals, as well as operations that involve high temperatures and heat. Furthermore, this equipment is subjected to a variety of meteorological conditions, which impact the reactor surface. Key players are making strategic moves to enhance their footprint in market. In June 2021n AkzoNobel announced the acquisition of Grupo Orbis, a Colombian paints and coatings manufacturer,. In November 2019, AkzoNobel built a research and innovation facility in Felling, Gateshead, UK, with an investment of USD 10 million for product testing in simulations of the world's most harsh conditions. The adoption of heavy-duty corrosion protective coatings may prevent or decrease the impact on the reactor surfaces. As a result, the equipment's operating life is extended. According to the EU regulations, any product used for concrete repair regulations was designed to limit volatile organic compound (VOC) emissions from coatings. LEED GreenSeal GC-03 2nd Ed., 1997 and REACH both stipulate the VOC content of CUI and SOI coatings in grammes per litre (g/l). These laws have compelled coating manufacturers to adhere to the guidelines by lowering VOC levels. However, the increased demand for high-efficiency CUI & SOI coatings is likely to create considerable prospects for market expansion.

The key regions considered for the global Corrosion Under Insulation (CUI) & Spray-on Insulation (SOI) Coatings Market study includes Asia Pacific, NA, LA, Europe and ROW. APAC is a hotbed of foreign investment and thriving manufacturing sectors because of low-cost labour and cheap land availability. The increasing marine, oil and gas, and petrochemical industries are driving up demand for CUI and SOI coatings. These reasons are driving the demand for CUI and SOI coatings in Asia Pacific. The APAC CUI & SOI coatings market is expected to grow at the fastest rate in terms of value between 2022 and 2028. This expansion is attributed to the expanding oil and gas, petrochemical, marine, and power generation industries. The expansion of these business fuels demand for CUI & SOI coatings. Because of the region's rapid economic expansion, Asia Pacific is a lucrative market for CUI and SOI coatings makers.
