Global Corrugated Box Packaging Market is valued approximately USD XX billion in 2017 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2018-2025. The Corrugated Box Packaging Market is continuously growing on a surging trend in the global scenario. Corrugated boxes are paper-based container boxes used to pack various durable and non-durable goods. These boxes are made up of corrugated paperboard that contain rows of air columns. The columns make their paper tougher than average cardboard with air acting as a cushion for any items inside them. Increasing demand of packaging boxes due to rapid industrialization and development of e-commerce marketplace are the driving factors exerting positive influence on the market growth. In addition, growing demand from food & beverage industry and rise in demand for packaged products are also propelling the Corrugated Box Packaging demand. Corrugated box packaging protects items during long distance transportation. They are extremely cost effective, sustainable, lightweight, versatility and completely recyclable. These benefits of corrugated box packaging also results in increase in demand assisting the growth of market. However, the volatility in corrugated box prices and availability of low-cost alternative to corrugated boxes such as corrugated plastic container are some factors which are limiting the global Corrugated Box Packaging market. Moreover, poor barrier property of corrugated packaging

material is also restricting its use across the world.
