## **Abstracts**

Global Corrugated Plastic Box Market is valued at approximately USD xyz billion in 2021 and is anticipated to grow with a healthy growth rate of more than xyz % over the forecast period 2022-2028. Corrugated plastic boxes, like corrugated cardboard, are formed of hollow-on-the-inside sheets that are significantly lighter than standard plastic, plywood, or metal sheets, making them easier to pack and transport. Rising need for secondary packaging, availability of excellent features and rising expansion of facilities by key players to increase production capacity has driven the adoption of Corrugated Plastic Box Market across the projected period. For Instance: Minnesota Diversified in January 2019 expands its facility by adding 11,000 square feet to its Minneapolis headquarters facility to cater to the increasing demand for corrugated plastic boxes from the end-users. Also, incorporation of advanced technology like RFID (Radio Frequency Identification System) and rising mergers & acquisitions to serve the end-user industries are most likely to boost the overall growth of the Corrugated Plastic Box Market. However, high cost of the corrugated plastic box can obstruct the Market's expansion over the projection period of 2022-2028.

The key regions considered for the Global Corrugated Plastic Box Market study include

Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world.
