Abstracts

Global Counter-IED Market is valued approximately at USD 1.9 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 2.64% over the forecast period 2021-2027. The Counter IED System is a system that utilizes improvised devices to detect explosives and explosive components (IEDs). These devices are typically triggered by the operator from a safe distance, such as wristwatches and mobile phones. Educating homeland security personnel, developing new EOD devices, and other approaches are all being used by various countries to improve counter-IED capabilities. For instance, The Joint Improvised Explosive Device Defeat Organization (JIEDDO) of the United States is involved in advanced technology research and acquisition, as well as developing standards and doctrine and enhancing EOD and IED technical capabilities. As part of its ongoing priority, the US authorized a USD 1.7 billion deal with CACI International Inc to provide deployable analytical operations, intelligence, and training services to the Joint Improvised-Threat Defeat Organization in 2017. (JIDO). Furthermore, Technological Advancement in IED Detection Systems and Increasing Terrorist Activities Worldwide propel the market growth further. For instance, as per Statista, Italy experienced 24 terrorist attacks in 2020, the most of any European Union country. France had the second-highest number of terrorist attacks in 2020, with 15, followed by Spain with 9 attacks. However, Protectionist Policies leading to Limited Access to Counter-IED Technologies, may impede market growth over the forecast period of 2021-2027.

North America is the leading market share in the counter-IED industry, owing to the high

demand for counter-IED equipment in the United States.. The US is educating its troops and law enforcement agencies about how to deal with IED threats, which is a fundamental component of military tactical training. The US also has soldiers stationed in other parts of the world, such as the Middle East and Africa, and Asia-Pacific, where IEDs present a greater threat to civilians as well as US military personnel.
