## **Abstracts**

Global Crane Market is valued at approximately USD 35.54 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 6.3% over the forecast period 2022-2028. Cranes are equipped with cables and pulleys that are useful when it comes to moving objects. They are usually temporary structures that are either mounted on a custom-built vehicle or fixed to the ground. Growth of end-user industries such as manufacturing, construction, material loading, shipbuilding, and others is majorly driving growth of the market. According to Statista, construction industry spending worldwide surged from USD 12.5 trillion in 2020 to USD 12.9 trillion in 2021 and is expected to reach USD 14.8 trillion by 2025. Also, government infrastructure projects are injecting growth into the market. In 2016, the United Kingdom government-initiated National Infrastructure Delivery Plan 2016–2021 by investing approximately USD 393.25 billion over the period of 5 years. Furthermore, new product launches and technological advancements in the product are expected to fuel demand in coming years. In February 2022, Terex India launched 'Franna' brand of pick and carry cranes for catering needs of industries such as construction, ports, and others. Additionally, in April 2022, Tadano Ltd. made an announcement regarding commercializing the world's first electric rough terrain crane. This crane will be able to drive to the job site and complete all lifting operations using battery/electric, instead of diesel power to deliver zero-emissions operation. However, high cost of purchase and maintenance are major factors projected to hamper growth in coming years.

The key regions considered for the Global Crane market study include Asia Pacific,

North America, Europe, Latin America, and Rest of the World. Asia Pacific is leading the global market with the highest revenue and is also expected to grow with the highest growth rate during forecast period owing to rapid growth in end-user industries such as construction, manufacturing, infrastructure development and others.
