Abstracts

Global Crawler Camera System Market is valued approximately at USD 176.47 Million in 2020 and is anticipated to grow with a healthy growth rate of more than 8.5% over the forecast period 2021-2027. Crawler camera system is a portable video inspection system, which provides reliable and accurate data with crystal-clear images. Rising government initiatives for pipeline assessment, technological advancement in the product, and incessant rise in sewer management system are fueling the market growth. For instance, in February 2018, Envirosight launched VC500 controller for the Rover X sewer crawler. The controller is capable of enabling the operator to build a PACP-compliant inspection, and upload it wirelessly to the cloud. Furthermore, rising investment by the private players and adoption of magnetic crawlers are expected to boost the demand in coming years. For example, in February 2019, Eddyfi Technologies acquired Inuktun, a developer and manufacturer of remotely operated crawlers and camera systems. However, fast battery drainage and high cost of crawler camera system may hamper its adoption during forecast period.

The regional analysis of the global Crawler Camera System Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the dominating region with highest market share due to continuous expansion of municipal industrial areas which increases the demand for modern video inspection devices. Whereas Asia Pacific is expected to grow with the highest growth rate due to growing deployment of modern technology to perform inspection of drains or pipeline in the region.
