Abstracts

Global Crypto Asset Management Market is valued approximately USD 0.3 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 23.8 % over the forecast period 2020-2027. Crypto asset management is a platform that manages the digital assets as well as stores and maintains the distributed electronic ledger through the network. It contains cryptocurrency funds, cryptocurrencies like bitcoin, block-chain companies and initial coin offering (ICO). Crypto asset management is widely used in financial institutions and retail & eCommerce. The global Crypto Asset Management is being highly demanded due to the coronavirus pandemic as many countries are approaching crypto asset management for better liquidity of funds across the nation. The high remittances in developing countries, growth in venture capital investments, safeguarding cryptocurrency assets and proliferation of blockchain technology are the factors responsible for the growth of the market. Furthermore, the introduction of products and services and other strategic alliance by market key players will create a lucrative demand for this market. For instance: on 30th January 2020, U.S. based Coinbase established Cryptocurrency Custody Arm, an entity in Dublin, Ireland for further expanding its crypto custody services to Europeans institutions. However, lack of

regulatory framework and lack of awareness and technical understanding regarding cryptocurrency is the major factor restraining the growth of global Crypto Asset Management market during the forecast period.

The regional analysis of global Crypto Asset Management Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the rising demand for the crypto asset management solutions and services. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027.
