Crypto ATM is basically used to transfer cryptocurrency easily through an ATM machine. Cryptocurrency is an alternative form of payment to cash, check and credit cards. The rising digital fund transfer has led to the adoption of Crypto ATM across the forecast period. For Instance: according to the International Monetary Fund in 2020, the digital forms of money transfer boons the emerging market and the lower economies, according to the source the adoption of digital money transactions is expanding rapidly over 95 countries, an amount of approximately USD 2 billion transacted through digital modes every day. Increasing installation of Crypto ATMs in bars, restaurants, and general stores etc pushes the growth of the Crypto ATM Market. Also, with the increasing acceptance of cryptocurrency across industries, the adoption & demand for Crypto ATMs is likely to increase the market growth during the forecast period. However, lack of awareness and technological knowledge impedes the growth of the market over the forecast period of 2022-2028.

The geographical regions considered for the global Crypto ATM market analysis include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is dominating the region across the world with respect to huge market share due to the presence of large number of crypto ATMs, increasing awareness towards the adoption of digital money transfer etc. Whereas, Asia-Pacific is also estimated to attain a maximum growth rate during 2022-2028.
