Abstracts

Global curing agent market is valued approximately USD XX billion in 2017 is anticipated to grow with a healthy growth rate of more than 6.6 % over the forecast period 2018-2025. Curing agents are the additives used for curing or hardening of various materials in surroundings. These agents are used for wind blade fabrications owing to their low weight, high sheer and compressive strength. Curing agents also improves the performance of composite mechanical properties in rotor blades in turn enhancing the wind turbine performance.

Rising demand of curing agents in applications such as electrical & electronics, composites, coatings in various countries including China, Brazil, Mexico and Southeast Asian countries is majorly driving the market towards high CAGR during the forecast period. The demand of curing agents escalated due to rising demand of wind power energy. For instance, as per World Wind Energy Association (2018), the total installed capacity of wind energy increased to 539,291 in 2017. In addition, infrastructural development in emerging economies and technological advancements for manufacturing these curing agents are some of the factors supplementing the market growth. However, price fluctuations of raw materials might affect the production cost thereby restricting the market growth. Strict regulations associated with chemical manufacturing industries is may hinder the growth of global curing agent market.

The regional analysis of global curing agents market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to rising demand of Curing Agents in end-user industries. Europe also contributes a satisfactory growth in the global Curing Agents market due to increasing demand of renewable energy. Asia-Pacific is also anticipated to exhibit higher growth rate / CAGR over the forecast period 2018-2025 due to growth in end-user industries including energy sector in developing countries such as India, China and Japan.
