Abstracts

Global Curling Irons Market is valued approximately USD 19.3 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 10.3% over the forecast period 2020-2027. Curling irons are instruments that use heat to modify the structure or form of hair. Some versions use electricity for heating while butane or battery-powered cordless iron is ideal. When used on hair, curling irons or curling tongs create curves or waves in the hair that can be used to create curves in varying sizes. There are many types of curling iron available, and they differ depending on the shape and size of the barrel, diameter, form of handle, and material. Small barrels may be used to form ringlets or spiral curls, while wide barrels are commonly used to strengthen hair style by supplying curly structure and hair length. The barrel may be either cone-shaped, cone-shaped in reverse, or cylindrical. Increased use of low-cost hair grooming tools is expected to boost product demand to achieve the desired hairstyle. In addition, it is anticipated that growing traction in hair styling tools with digitally correct heat and speed changes along with vitamin coatings for optimum hair safety would fuel demand. Increasing preference for compact and less time-consuming hair styling devices is likely to lead to consumer development. It is expected that technologically innovative goods will gain substantial momentum among the younger generation, which is expected to fuel the demand in turn. The key players of global Air Dried Food market have adopted various strategies to gain competitive advantage including product launch, mergers and acquisition, partnerships and agreements, investment, funding and others. For instance, In January 2019, Lunata Beauty unveiled a 32 mm titanium barrel and interchangeable clip with Lunata Cordless, Convertible Curling Wand / Iron. Also, Dyson introduced a

new hair styling tool, also known as Airwrap Styler, in 2018. It was designed to help consumers appreciate its multifaceted use in particular. The method may be used to twist, smooth, and dry. However, Technology advancement would restrain the market growth.

The regional analysis of global Curling Irons Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms Increasing preference for compact and less time-consuming hair styling devices is likely to lead to consumer development. It is expected that technologically innovative goods will gain substantial momentum among the younger generation, which is expected to fuel the demand in turn. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such Increased use of low-cost hair grooming tools is expected to boost product demand to achieve the desired hairstyle. In addition, it is anticipated that growing traction in hair styling tools with digitally correct heat and speed changes along with vitamin coatings for optimum hair safety would fuel demand would create lucrative growth prospects for the Curling Irons Market across Asia-Pacific region.
