## **Abstracts**

Global Dairy Ingredients Market is valued approximately at USD xx Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.83% over the forecast period 2021-2027. The global Dairy Ingredients market is being driven by increasing production of milk around the world as it is used in everyday food diet in different ways. For instance, according to the World Bank, there has been increase in milk production from 530 million tonnes in 1988 to 843 million tonnes in 2018. The other driving factor is the increase in favorable government initiatives & policies related to agriculture. For instance, in 2020, Indian Government launched Innovation and Agri-entrepreneurship Development programme under the Rashtriya Krishi Vikas Yojana to promote agri-entrepreneurship by providing financial support to the start-ups. Furthermore, increase in world population which rises food demand, enhancing food & beverage industry and increasing demand for milk protein in daily lifestyle will provide new opportunities for the global Dairy Ingredients industry. However, high adoption of veganism by the population and increase in lactose intolerant consumers may impede market growth over the forecast period of 2021-2027.

The regional analysis is based on the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World for the global Dairy Ingredients Market. Asia-Pacific is the leading region across the world in terms of market share and is also

anticipated to exhibit the highest CAGR over the forecast period 2021-2027 due to rising production of milk products through favorable government policies, increasing end-use industries of milk, and increasing investments by the private companies in the region.
