Abstracts

Global Dairy Processing Equipment Market is valued approximately USD 8.7 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 5.4% over the forecast period 2020-2027. Dairy processing equipment helps to process milk for the preparation of different products such as cream, butter, cheese, yoghurt, and others. It preserves products for the longer period and reduces the chances of food-borne diseases. Dairy processing equipment is used in the dairy industries for the production of milk based nutritional and packaged dairy products. The shift of preference from raw milk to processed milk, growing demand for dairy products and demand for multi-functional dairy equipment are the few factors responsible for growth of the market over the forecast period. Moreover, rising consumer consciousness for healthy products with low fat, low cholesterol, low sugar, and new flavors fuels the consumption of processed dairy products, which drives the dairy processing equipment market. For instance: as per Dairy Global Report, In India, the export of butter, ghee and butter oil tripled at 46,137 metric tons in the financial year 2018-19, as compared to 16,616 metric tons exported during 2017-18. Furthermore, the introduction of products and other strategic alliance by market key players will create a lucrative demand for this market. For instance: on 17th February 2020, Primodan A/S announced an agreement to acquire

SPX Flow's yellow cheese-making technologies until the end of 2021. This acquisition will offer various cheesemaking solutions and technologies such as curd-making, pressing and final bringing systems. Whereas, increasing energy cost is the major factor restraining the growth of global Dairy Processing Equipment market during the forecast period.

The regional analysis of global Dairy Processing Equipment market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading/significant region across the world owing to the rising incidences of non-communicable disease including obesity, malnutrition, joint issues.
