Abstracts

Global Debt Financing Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028.

The Debt Financing is a technical term for borrowing money from an outside source with the promise to return the principal plus the agreed-upon. Debt Financing is offered by banks, financial institutions, NBFCs in form of secured and unsecured bonds, & loans. One of the biggest benefits of debt financing is that borrower won't be giving up his/her ownership of the business. Other advantage of debt financing are low interest rates, tax deduction benefits. The rising penetration of digital lending solutions and increasing adoption of debt financing due to low insurance cost as well as strategic initiatives from leading market players are factors that are accelerating the global market demand. For instance, according to Statista – in 2019, Digital lending in India was estimated at USD 110 billion, and the digital lending market is projected to grow to USD 350 billion by 2023. Furthermore, leading market players are working towards collaborations and co-lending agreements to capitalize the growing demand for Debt Financing. For instance, London, UK based HSBC Holdings plc (“HSBC”) and Singapore based investment company Temasek announced a partnership to work towards a debt financing platform dedicated to sustainable infrastructure projects with an initial focus on Southeast Asia. Moreover, in March 2022, India based State Bank of India (SBI) signed a co-lending agreement with 5 Housing Finance Companies (HFCs) to sanction home loans. The bank partnered with PNB Housing Finance Limited, IIFL Home Finance Limited,

Shriram Housing Finance Limited, Edelweiss Housing Finance Limited, and Capri Global Housing Finance Limited. Also, growing emergence of NBFCs & Fintech Start-ups and increasing expansion of private lending sources are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, rising concern over high interest rates from central banks worldwide coupled with negative impact of covid 19 pandemic on end use segments impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Debt Financing market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing utilization of debt financing instruments and presence of leading financial institution and Banks in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as the growing rising number of infrastructure projects being commissioned and increasing penetration of private lending sources in the region, would create lucrative growth prospects for the Debt Financing market across the Asia Pacific region.
