Global Deburring Machine Market is valued approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. Deburring machine is used to remove unwanted pieces of material or burrs that are left out after completion of other machining operations such as turning, grinding, drilling and milling. Deburring machine is used to provide proper finish to the product. Growing automotive industry and rising technological advancements in industries are key drivers for the growth of Deburring Machine market. According to India Brand Equity Forum domestic automobiles production increased at 2.36% CAGR between FY 2016- 2020 with 0.026 billion vehicles being manufactured in the country in FY 2020. Overall, domestic automobiles sales increased at 1.29% CAGR between FY 2016-FY 2020 with 0.021 billion vehicles being sold in FY 2020. Also, as per Center for Automotive Research (CAR) – the US auto industry spends USD 16 to USD 18 billion every year on research and product development – 99 percent of this expenditure is funded by the industry itself. Due to the industry’s consumption of products from many

other manufacturing sectors, it is a major driver of the 11.5% manufacturing contribution to GDP of US. Also, with the increasing demand from end use industries, the adoption & demand for Deburring Machine is likely to increase the market growth during the forecast period. However, high initial investment requirement for installation of Deburring Machine and high maintenance cost impedes the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Deburring Machine market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to increasing technological advancements in the region and surging automotive market. Whereas, Asia-Pacific is anticipated to exhibit highest growth rate / CAGR over the forecast period 2021-2027. Factors such growth in automotive production in the region would create lucrative growth prospects for the Deburring Machine market across Asia-Pacific region.
