Abstracts

Global Dehydrated Onions Market is valued approximately USD 1.09 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.1% over the forecast period 2021-2027. Dehydration is mostly used to preserve foods in order to increase their store lives, making them perfect for use in a variety of packaged or processed meals. In today's market, dehydrated onions are a healthy option for regular onions. Because of the expanding prominence and desire for convenience/packaged foods, dehydrated onions are anticipated to see greater consumption internationally. Producers are constantly striving to provide high-nutrient dried foodstuffs for ready-to-cook either on snacks and meals, which is anticipated to be another important factor influencing global dry veggie consumption, especially dehydrated onions. In response to customer needs for better onions as well as other foods, food producers are proactively applying research and innovation and technological advancements. Many food manufacturers are attempting to minimize salt, sugar, and sodium levels in their goods. For example, in August 2017, ITC, India's largest multi-business conglomerate, announced its foray into the dehydrated vegetable sector, supplying consumers with nutritious foods. The popularity of gluten-free meals, particularly dehydrated onions, is

fueling sales of prepackaged meals. The introduction of healthier products is expected to stimulate market production and enhance consumer interest in a variety of dehydrated meals. Anuha Foods introduced a new line of ready-to-cook products under the Zilli's trademark in February 2021, containing dehydrated onion flakes, while under gluten-free and dehydrated culinary product categories. However, the global expansion of this market is projected to be hampered by fluctuation in the production and expense of vegetables, owing to fat contents and changes, as well as resource utilization. Also, excessive intake of dehydrated veggies and onions, as well as the availability of very nutritionally-rich food materials, are expected to provide many opportunities for growth in the coming decades.

Due to a rise in interest for gluten-free food, nations in the European region have seen a surge in sales for dried onions. Growing need and demand for processing onions in the North American region is expected to create thriving marketplaces. This is related to a growth in the sale of dry foodstuffs, which is linked to people's increased health awareness. Fresh onions are only available during specific seasons in the Asia Pacific region's developing countries, such as India and China, presenting a profitable opportunity for dry onion manufacturers to provide clients with a fair option specifically during off seasons. As a result, in the coming few years, this region is expected to hold a significant portion of the industry for dehydrated onions.

Major market player included in this report are:

Olam International
Jain Farm Fresh Foods Ltd.
