Abstracts

Global Dental Crowns Market valued at approximately USD 1.77 billion in 2023, is projected to expand at a compound annual growth rate (CAGR) of around 7.3% over the forecast period 2024-2032. Dental crowns are crucial fixed prosthetic devices used to restore teeth' strength, shape, and size, significantly improving dental aesthetics. Fabricated from materials such as ceramics and porcelain, these crowns play a pivotal role in safeguarding weakened teeth, covering dental implants, and restoring broken teeth.

The rising prevalence of dental disorders globally is a primary driver of market growth. As reported by the World Health Organization, oral diseases are a substantial health burden due to their association with pain, discomfort, and disfigurement. The increasing incidence of dental conditions such as dental caries, periodontal diseases, and oral cancers is propelling the demand for dental crowns. Moreover, the growing demand for dental procedures due to heightened health awareness and the expanding geriatric population, which is more susceptible to dental issues, further stimulates market expansion.

Research and development activities are also significantly boosting market growth. With increased expenditure on medical instruments and devices, especially in developed and developing economies, the dental crown market is witnessing lucrative growth

opportunities. Additionally, advancements in CAD/CAM technologies and continuous innovations in dental implants are expected to provide substantial growth opportunities for market players. Despite the promising growth, the market faces certain challenges. High costs associated with dental implants and procedures, lack of favorable reimbursement scenarios, and limited infrastructure in developing economies are potential barriers. Moreover, the risks associated with root canal treatments and the lack of suitable healthcare infrastructure in low- and middle-income countries pose significant challenges.

The key regions considered for the Global Dental Crowns Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is a dominating region in the Global Dental Crowns Market in terms of revenue. The market growth in the area is being attributed to factors including robust healthcare infrastructure, the presence of major market players, and large population suffering from dental ailments. Whereas, the market in Asia Pacific is anticipated to grow at the fastest rate over the forecast period fueled by government initiatives to promote healthcare, rising health awareness, and increasing demand for advanced dental technologies.
