Abstracts

Global Dental Diamond Burs Market is valued approximately at USD 120.4 million in 2020 and is anticipated to grow with a healthy growth rate of more than 8% over the forecast period 2021-2027. In modern dentistry, dental burs are an important tool for surgical treatment and tooth restoration. It's a small drilling tool that works in conjunction with a hand piece to cut hard tissues like bones and teeth. It is a motorized rotary tool with a cutting blade on the edge. The shank, neck, and head are the three parts of a dental bur. Burs come in a variety of sizes and forms, which has led to the development of numbering systems for their identification, such as the US and ISO (International Standards Organization) numbering systems. Dental diamond burs market is driven by the key factors such as rising dental tourism in emerging markets and growing prevalence of oral health disorders. For instance, according to the Statista, large-scale survey conducted across India in 2020, around 17% of respondents had cavities or decay and approx. 11.48 percent people have bad breath and 5.84 percent people have bleeding gums, appeared to be the most common oral medical problems among the population. Furthermore, Oral piercing is becoming increasingly popular, according to the American Dental Association, resulting in a high risk of infection. Young individuals are more likely to have oral piercings, with the tongue being the most popular site for piercings. Bleeding, broken or damaged teeth, lacerations/scarring, palatal erythema, swelling, gingival recession, or unusual discharge from the pierced area are all the likely consequences. Such events increase the need for treatment care. However, Limited

reimbursement, may impede market growth over the forecast period of 2021-2027.

During the forecast period, the APAC region is expected to be the largest market with the highest CAGR. APAC's growth is fueled by rising disposable income in nations like China and India, a growing middle-class population, increased demand for packaged foods, and the expansion of the food and beverage sector. Furthermore, increasing consumer spending and packaging material manufacture in growing economies such as China and India are related to the rise of the dental diamond burs market in the APAC region. During the projection period, China is expected to be the world's fastest-growing market.
