## **Abstracts**

Global Dental Implants and Prosthetics Market is valued at approximately USD 10.23 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 12.4% over the forecast period 2022-2029. Dental implants are referred to as surgical components that interface with the skull or the bone of the jaw to support dental prosthetics that includes a bridge, denture, and crowns to act as an orthodontic anchor. The factors that drive the growth of the market are the increase in demand for cosmetics dentistry, rising dental tourism and an improvement in disposable income in developing countries.

The increasing incidence of dental diseases such as dental caries and periodontal diseases is primarily attributed to the market growth. According to the WHO Global Oral Health Status Report (2022) stated that approximately 3.5 billion people globally, three out of every four of whom live in middle-income countries, are estimated to have oral disorders. Furthermore, 2 billion individuals are estimated to have permanent tooth decay, compared to 514 million children who experience primary tooth decay worldwide. . Thereby, the rising cases of dental ailments among the population are fostering the demand for dental implants and prosthetics. Whereas, the high cost of dental implants and the several risk are associated with tooth loss with dental bridges are the factors hampering the growth of market over the forecast years. However, the low penetration

rate of dental implants and growth in investment in CAD/CAM technologies are the lucrative opportunity for the growth of market over the forecast years.

The key regions considered for the Global Dental Implants and Prosthetics Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America holds the highest share of the worldwide dental implant and prosthetics market due to the rising demand for high-end implants and the manufacturers' expanding investment in R&D activities to produce cutting-edge and creative products. . Whereas, Asia Pacific is the fastest-growing segment in the global dental implants and prosthetics market in the forecasted period of 2022-2029. Factors such as rise in dental tourism and an increase in disposable wealth in emerging nations are bolstering the development of the regional market.
