Abstracts

Global Dental Matrix Systems Market is valued at approximately USD 356.2 million in 2021 and is anticipated to grow with a healthy growth rate of more than 5.8% over the forecast period 2022-2028. The dental matrix systems are tools that assist orthodontists in placing and aligning teeth during treatment. These devices can be used for both single-toothed and multi-toothed placement. The rise in the number of patients having dental problems, increasing behavioral risk factors such as smoking and diabetes, and the surging demand for restorative and aesthetic dentistry are the factors contributing to the growth of the market. For instance, according to the World Dental Federation (FDI), in 2019, dental disease affects about 3.9 billion persons all over the world with untreated dental caries impacting nearly 44% of the world's population.

Consequently, the increasing dental problems are directly stimulating the demand for dental matrix systems, which, in turn, augment the market growth across the globe. However, the high cost of surgical treatment and lack of healthcare facilities in underdeveloped and developing countries impede the growth of the market over the forecast period of 2022-2028. Also, rising dental tourism in emerging economies and the introduction of novel technologies pertaining to dental procedures are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Dental Matrix Systems Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North

America is the leading region across the world in terms of market share owing to the increased reimbursement for dental services and the availability of skilled professionals. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the rising availability of advanced healthcare facilities, increasing medical tourism, as well as rising population, would create lucrative growth prospects for the Dental Matrix Systems Market across the Asia-Pacific region.
