Abstracts

Global Deodorization System market is valued approximately at USD 3.40 billion in 2018 and is anticipated to grow with a growth rate of more than 4.60% over the forecast period 2019-2026. Deodorization are referred as a steam distillation process in which good quality steam is injected into soybean oil at a high temperature and high vacuum, that remove Free fatty acid (FFA) and volatile odiferous components to obtain odorless and bland oil. Rise in industrialization and rapid growth in urbanization growth in the oil industry, rising technological advancement and increase in demand for higher nutritional value in edible oil are the factors propelling the growth of market over the forecast years. For instance: on 5 March 2018, as per International Energy Agency (IEA), globally the demand of oil is growing with an average of 1.2 mb/d and reach to 104.7 mb/d till 2023 from 6.9 mb/d in 2018. Also, China and India together are expected to contribute about 50% oil demand globally. Whereas, high energy consumption and technical difficulties during oil processing is hampering the growth of market over the forecast years. Whereas, growth of the manufacturing sector in Southeast Asia and upcoming demand for hybridization of algal oils with regular oils is a lucrative opportunity for the growth of market over the upcoming years.

The regional analysis of global Deodorization System market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific accounts for the largest share in the global deodorization systems market due to the high industrial growth potential and industry favorable policies. Also, Asia Pacific is the fastest growing region in the global deodorization system market due to the increasing demand for edible oil due to growing population and increasing manufacturer participant via setting up of new refinery units propel the growth of market over the forecast years.
