The Dew Point Thermometer can be defined as a Dew Point Thermometer instantiation of a hardware router. Dew point thermometer has applications in temperature sensitive logistics & transportation industry for monitoring temperature of refrigerated trucks, warehouses, construction sites. These thermometers are also used in HVAC installation applications. The growing (HVAC) Heating, ventilation, and air conditioning Industry and increasing end use applications of dew point thermometer as well as recent product launches from leading market players are factors that are accelerating the global market demand. For instance, according to Statista – in 2020, the global heating, ventilation, and air conditioning (HVAC) market was estimated at USD 250.67 billion, and the market is projected to grow to USD 367.5 billion. Furthermore, leading market players are stressing towards introducing new products to leverage increasing demand for dew point thermometer. For instance, UK based Measure Monitor Control, a distributor of valve and instrument solutions launched its new portable dew point meter called S520. This new device features touchscreen display incorporates and is ISO 8573 purity class certified. It offers measurement of humidity, pressure and temperature in numbers as well as graph format. Also, growing demand for temperature-controlled logistics and increasing focus towards environment monitoring are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, high cost associated with dew point thermometer and lack of awareness in developing economies impede the growth of the market over the forecast

period of 2022-2028.
