## **Abstracts**

Global Diabetic Food Market is valued approximately USD 11.09 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.6 % over the forecast period 2021-2027. Diabetic food items are dietary foods that are low in sugar and carbohydrate content and assist to manage blood sugar levels. Low-calorie sweeteners and diet beverages using low-calorie sweeteners such as lactitol, aspartame, and sorbitol are also included in diabetic meals. The increasing usage of diabetic food items in the manufacturing of medical food and insulin to combat diabetes occurrences and obesity throughout the world is expected to boost market growth. The increasing prevalence of diabetes throughout the world is a major factor driving the growth of the diabetic food products market. The global ageing population, which is predisposed to diabetes, is predicted to increase the market growth of diabetic dietary items. According to the International Diabetes Federation, roughly 463 million individuals (20-79 years) had diabetes in 2019; by 2045, this figure is expected to climb to 700 million globally. Furthermore, one in every five adults over the age of 65 has diabetes. According to the World Health Organization, the share of the world's population over 60 years old will nearly double from 12 percent to 22 percent between 2015 and 2050. By 2050, 80 percent of the world's elderly would live in low- and middle-income nations. However, the high cost of diabetic food as a result of the use of low-calorie sweeteners and other healthful components rises and lack of awareness about the health advantages of diabetic food hinders the growth of the market over the forecast period of 2021-2027. Also, the growing demand for nutritional drinks among diabetes patients, as well as manufacturers' increased emphasis on building new R&D facilities to enhance their market presence is likely to increase the market growth during the forecast period.

The global Diabetic Food market is segmented into main regions such as Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the most dominating region across the world in terms of market share attributing to the Increasing health complications as a result of high blood glucose levels, an ageing population, and obesity. Whereas, Asia-Pacific is also expected to show the fastest growth over the forecast period 2021-2027. Factors such rapid globalization, rising population, rising disposable income among consumers, and rapid expansion in the dairy and confectionary sectors would create lucrative growth prospects for the Diabetic Food market across Asia-Pacific region.
