Abstracts

Global Diabetic Footwear Market is valued approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. Diabetic Footwear is majorly used by elder population because of growing concerns for the side effects associated with synthetic medicines. The diabetic footwear reduces the impact of pre-diabetic cells. The footwear can also be customized by the surgeon by taking the foots size of patient. The increasing case of diabetics is increasing the market growth for the diabetic footwear market. For Instance: as per the International Diabetes Federation, total adult population in Spain is 34,538,600 in year 2020 and around 10.5 % (around 3,619,100 adults) of this had diabetes.. Furthermore, protection from foot injuries which reduce the occurrence of fungal infection is driving the growth for diabetic footwear market. Also, the launch of new product and using advanced material such as leather, cotton, polyester, and nylon leads to the adoption & demand for Diabetic Footwear is likely to increase the market growth during the forecast period. However, consumers might find it uncomfortable to wear which impedes the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Diabetic Footwear market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the significant region across the world in terms of market share owing to the product are per available and the increasing number of diabetic cases.
