## **Abstracts**

Global Dishwashing Detergent Market is valued at approximately USD 17.98 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 8.2 % over the forecast period 2022-2028. Dishwashing detergent is a cleaning substance that is used in the dishwashing process. It's a high-foaming blend of multiple types of surfactants that's gentle on the hands and doesn't irritate the skin. Dishes, utensils, cutlery, glassware, and other items are the most common uses. Due to its high foaming nature, dish detergent has a variety of unofficial uses, including washing garments and cleaning oily surfaces. Growing popularity of machines to clean utensils and accelerating urbanization have led to the adoption of Dishwashing Detergent across the forecast period. For Instance: as per Statista in 2022, Sales of dish detergent in the United States by product type in 2020 was around 3.31 billion dollars during the 52 weeks ending September 6, 2020. Also, with the increasing demand for environmentally friendly goods, the adoption & demand for Dishwashing Detergent is likely to increase the market growth during the forecast period. However, low-cost alternatives are readily available which may impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Dishwashing Detergent market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading region across the world in terms of market share owing to the increase in the use of machines to clean utensils and growing urbanization. Whereas, North America is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as increasing demand for environmentally friendly goods would create

lucrative growth prospects for the Dishwashing Detergent market across North American region.
