Abstracts

Global Dispatch Console Market is valued at approximately USD 1.65 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.6 % over the forecast period 2022-2028. Dispatch Console basically provides software that provides a link between dispatchers and field personnel. It helps to monitor the safety of personnel, coordinate operations, and respond to emergencies etc. The increasing initiatives for public safety have led to the adoption of Dispatch Console across the forecast period. For Instance: according to the European Emergency Number Association in 2020, due to the growing attacks and threats from terrorism, government initiatives towards public safety are increasing rapidly. It includes expansion of manufacturers to provide safety solutions such as Atos, ALT Tech, ASELSAN and APD Communications. As per the same source, advancements are rising for public safety such as Openscape Emergency services, Atos multi-network dispatching and recording devices etc. Demand for time-saving for Operators enhances the market growth of Dispatch Consoles. Also, with the increasing importance of public safety LTE, the adoption & demand for Dispatch Console is likely to increase the market growth during the forecast period. However, rising cyber-attacks impede the growth of the market over the forecast period of 2022-2028.

The geographical regions considered for the Global Dispatch Console Market analysis include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America dominated the region across the globe in terms of huge market share due to the increasing awareness towards public safety, advanced communications, and networking infrastructure. Whereas, Asia-Pacific is also estimated to attain a maximum
