## **Abstracts**

Global Disposable Egg Trays Market is valued approximately USD XXX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XXX% over the forecast period 2021-2027.

Disposable egg tray or the cartoon tray refers to a biodegradable tray made of clear plastic, paper or cardboards designed to protect the eggs from damage. Increasing awareness towards protein diet that includes eggs and increasing demand for eggs are factors contributing to the market growth.

For instance, according to United Egg Producers, the US produced a total of 96.9 billion units in the year 2020 with approximately 325 million commercial laying hens by the end of the year 2020. Leading to an increase in the per capita consumption of eggs by 15% in the past 20 years.

However, constant fluctuations in the prices of raw materials and increasing competition from the packaging industry impedes the growth of the market over the forecast period of 2021-2027. Also, technological advancements in the production of egg trays are likely to increase the growth of the market in the forecasting period.

The regional analysis of global Disposable Egg Trays market when considering for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World has led to the analysis that Asia Pacific is a significant region across the world in terms of market share owing to establishment of key players in the region. Whereas, Europe is anticipated to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as increasing awareness towards protein diet coupled with

qualitative innovations in the production of disposable trays would create lucrative growth prospects for the Disposable Egg Trays market across Asia-Pacific region.
