## **Abstracts**

Global Disposable Hospital Gowns Markets valued approximately at USD 2.04 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 13.5% over the forecast period 2021-2027. The global disposable hospital gowns market is being driven by rapid rise in Covid-19 patients, increase in number of surgeries performed, and growth in prevalence of hospital-acquired infections. Furthermore, rise in sports injuries cases, accidents, and cardiovascular illnesses will provide new opportunities for the global Disposable Hospital Gown industry. For instance, according to the data of Worldometer, as of June 2021, there were around 171,469,3748 covid-19 cases globally of which, around 3,565,027 people died and in which 153,767,405 have recovered.
