Abstracts

Global Disposable Latex Gloves Market is valued at approximately USD XXX million in 2019 and is anticipated to grow with a healthy growth rate of more than XXX% over the forecast period 2020-2027. Latex is an organic material that is separated from flowering plants. This can also be made unnaturally by polymerizing a monomer as a styrene, which is blended by surfactants. These materials are typically used for the manufacture of latex gloves for surgical and physical inspection. These gloves are frequently used in healthcare practices and it has a common application among medical professionals. Latex gloves are also biodegradable and have a high tactile sensitivity and elasticity. They also offer comfort to the healthcare professionals for improving their work efficiency and competence. Therefore, these factors are anticipated to accelerate the growth of the segment during the forecast period. Although the recent outbreak of COVID-19 pandemic has been strengthening the demand for industrial hand gloves, as the government is mandating the usage of disinfectant and hygienic products, as a preventive measure for COVID-19 spreading, which has resulted in the changing dynamics of the market spaces. This, in turn, is positively influencing the market growth in the forthcoming years. Furthermore, the rise in cases of infectious diseases such as COVID-19, along with an increase in the number of surgeries are the few factors responsible for the CAGR of the market during the forecast period. According to the World Health Organization (WHO), as of 30th June 2020, the global number of COVID-19 cases was estimated at around 10 million, representing an increase from 1 million on 1st April 2020. Therefore, this factor is positively influencing the demand for disposable latex gloves in the recent year. However, the availability of local and inexpensive gloves is one of the major factors restraining the market growth over the

forecast period of 2020-2027.

The regional analysis of the global Disposable Latex Gloves market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the rapid growth in the healthcare & food industry, along with the presence of a significant number of manufacturers in the region. Whereas, Europe is anticipated to exhibit the highest growth rate / CAGR over the forecast period 2020-2027. Factors such as establishing a new reform involving the safety of workers and the growing automotive sector would create lucrative growth prospects for the Industrial Hand Gloves market across the European region.
