Global Distributed Control System Market is valued approximately at USD 17.0 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 5.0% over the forecast period 2019-2026. A distributed control system (DCS) is an automated control system for a procedure or plant typically with many control loops in which self-directed controllers are circulated throughout the system, although there is no vital operator supervisory control. Distributed control system has numerous local controllers sited throughout the area that are connected by a high-speed communication network. A DCS are utilized to regulate industrial processes and improve their safety, cost-effectiveness and reliability. DCS are most commonly used in various processes including, agriculture, chemical plants, petrochemical (oil) and refineries, nuclear power plants, water treatment plants and many others. Increase in power generation capacity aligned with increasing use of renewable and nuclear energy sources and the emergence of open source DCS solutions are the few factors responsible for the growth of the market over the forecast period. For instance, According to the International Renewable Energy Agency (IRENA), there would be USD 400 billion of annual investment in renewable energy source by 2020. Similarly, according to the IRENA report 2016, USD 11 billion was invested in renewable energy generation, across the GCC countries in 2016. Moreover, surging adoption of Industrial Internet of Things (IIoT) for real-time decision making coupled with changing face of the manufacturing

industry in the middle east are the major factor likely to create lucrative growth opportunities to the market. However, availability of low cost alternative and sluggish response time of DCS are the few factor restraining the growth of global Distributed Control System market during the forecast period of 2019-2026.

The regional analysis of global Distributed Control System Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the leading/significant region across the world in terms of market share owing to the increasing demand for power and power generation capacities along with growing industrial infrastructure in the region. However, Asia-Pacific is anticipated to exhibit highest growth rate / CAGR over the forecast period due to surging manufacturing industry across the region. For instance, according to the world bank, china's manufacturing added value in 2017 was nearly USD 3.59 trillion, which is the largest in the world. Thus, the china's economy is substantially growing due to rising manufacturing and processing industry, which is expected to boost the growth of the market in the Asia-Pacific region.
