## **Abstracts**

Global Divalproex sodium market is valued at approximately USD XX million in 2020 and is anticipated to grow with a healthy growth rate of more than 6.2% over the forecast period 2021-2027. Divalproex sodium is an anti-epileptic medicine licensed by the Food and Drug Administration (FDA) for the treatment of migraine headaches, bipolar disorder manic episodes, and some types of seizures. Divalproex sodium is used to treat epilepsy because of its anticonvulsant effects. The growing number of people suffering from epilepsy and migraine headaches around the world is predicted to enhance demand for divalproex sodium dramatically. According to the World Health Organization's 2018 important statistics, epilepsy affects roughly 50 million people worldwide, making it one of the most common neurological diseases, and approximately 80% of those affected live in low and middle-income countries. Similarly, according to a study published in the Journal of Global Health in 2017, lifetime epilepsy prevalence in the Chinese population was 1.99 percent in 1990 and 7.15 percent in 2015. The market for divalproex sodium is growing because to the rising frequency of bipolar illnesses around the world. According to a 2017 study by the National Alliance on Mental Illness, the typical age of beginning of bipolar disorder is around 25, but it can also arise in adolescence or, less commonly, childhood. Bipolar disorder affects both men and women equally, with roughly 2.8 percent of the population in the United States being diagnosed, and nearly 83 percent of cases being categorized as severe. However, the use of divalproex sodium tablet and other known adverse reactions such as

neurobehavioral adverse effects, birth defects, and suicidal behavior may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global Divalproex sodium market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World (ROW). North America is the leading region across the world in terms of market share due to increased government initiatives and rising research and development for the introduction of new product in the region. Whereas North America is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to increased prevalence of epilepsy and head migraine among the population across the region.
