Abstracts

Global Dolomite Market is valued at approximately USD 3285.58 million in 2020 and is anticipated to grow with a healthy growth rate of more than 4.00 % over the forecast period 2021-2027. Dolomite is used as an ornamental stone, a concrete aggregate, and a source of magnesium oxide, as well as in the Pidgeon process for the production of magnesium. Increasing use of dolomite in cement production, growth in the construction and infrastructure sector has led to the adoption of Dolomite across the forecast period. For Instance: as per the IBEF, construction (infrastructure) activities stood at US\$ 26.14 billion and US\$ 25.38 billion, respectively, between April 2000 and June 2021. Also, with the increasing demand for pharmaceuticals, the adoption & demand for Dolomite is likely to increase the market growth during the forecast period. However, environmental concerns impede the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Dolomite market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the significant region across the world in terms of market share owing to the rapid expansion of end-use industries such as construction, water & sludge treatment. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as increasing production of cement & agrochemicals would create lucrative growth prospects for the Dolomite market across Asia-Pacific region.
