Global Door Phone Market is valued approximately at USD 3.80 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.7% over the forecast period 2021-2027. Door Phone is an electronic component which is installed at the entry door for two-way communication for security purposes. The global Door Phone market is driven by expanding adoption of smart home devices through artificial intelligence and maintaining security. For instance: according to the Statista, smart home penetration rate has increased from 9.25 in 2019 to 10.6 in 2020. The market growth is also to be driven by the rising product launches to extend market base.
