Global Double Walled Corrugated Hide Pipe Market is valued approximately at USD XXX billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2019-2026. Double Walled Corrugated Hide Pipe are pipes with two layer, a corrugated outer wall which is further molded to a smooth inner wall providing tremendous strength and durability and in addition, it maintains a light weight. The furrowed outer wall provides optimum strength underneath compressive loading kind covering layers and traffic (High Ring Stiffness). The intense yellow color of the inner pipe conjointly improves visibility in TV examination, providing optimum, conditions for acceptance testing. These pipes also possess properties such as good corrosion resistance, increased longevity of the pipes and reduced wear and tear. Hence these are a preferable alternative to concrete and metal pipes used in applications such as Oil and gas supply, Sewage systems, water pipelines and other construction projects. The rising construction and infrastructural projects across the globe drives the demand for Double wall Corrugated Pipes. As the construction increases the demand for underground drainage systems, and fibre electric cable network increases. This fuels the demand for Double wall corrugated hide pipes as these offer more advantages as compared to concrete and metal pipes. Further, the rising application of the Pipes in the Oil and Gas Supply drives the market towards growth. The increase in oil production and demand demands efficient way to transport oil which fuels the market growth. According to Statista more than 4 billion metric tons of oil is produced worldwide annually of which one-third is produced in middle east region. From 1990 to 2018 Saudi Arabia accounted to 266 billion barrels of oil reserves. The

state-owned Saudi Arabian Oil Company continues to identify, expand and enhance its oil production. In 2016 it discovered 2 new oil fields and one new gas field which bring the total to 130 fields which has a production capacity of 12 million barrels per day. Also, the company aims to double its gas production to 23 billion standard cubic feet per day. Hence the expansion and identification of the new fields and the efforts to increase its production forecasts an increase in the transportation needs which projects a growing Market for Double walled Corrugated Hide Pipes.
