## **Abstracts**

Global Dried Mushroom Market is valued at approximately USD 3.9 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 8.6% over the forecast period 2022-2029. Dried mushrooms are obtained from fresh, edible, and cleaned mushrooms. They are then dried entirely or trimmed to the desired style before drying. Dried mushrooms can also be made from frozen mushrooms through the help of lyophilisation these are known as freeze-dried mushrooms. Dried mushrooms last indefinitely if stored in an airtight container in a cool, dark place. The increasing demand for organic foods and growing urbanization along with changing consumption patterns are key factors driving the market growth.

The rising adoption of organic food products is driving the growth of the Global Dried Mushroom Market. For instance – as per USA based Good Food Institute (GFI) – in 2019, the retail sales of plant-based food products in the United States was valued at USD 5.4 billion, and it further increased to USD 6.9 billion in 2020, and USD 7.4 billion in 2021. Also, increasing penetration of hotels & restaurant chains and rising popularity of packaged food products would create a lucrative growth prospectus for the market over the forecast period. However, the high cost associated with Dried Mushrooms and temperature requirement associated with Mushroom cultivation stifle market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Dried Mushroom Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America

dominated the market in terms of revenue, owing to the dominance of branded products and the increasing demand for plant-based food products in the region. Whereas Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising emergence of direct-to-consumer brands and increasing demand for packaged food products in the region.
