Global Drinking Water Adsorbents Market is valued at approximately USD 516.31 million in 2021 and is anticipated to grow with a healthy growth rate of more than 4% over the forecast period 2022-2028. Adsorbents for drinking water are used to detoxify and eliminate pollutants water in order to obtain clean water, thus, an increasing governmental concerns over purification of water and growing concerns related to various health issues are factors contributing to the market growth. For instance: According to the National Cancer Institute, the number of cancer patients is expected to rise to 29.5 million cases, by the year 2040 from 18.1 million cases, in the year 2018.
