Abstracts

Global Drive in Movie Theatre Market is valued approximately USD 5.10 billion in 2022 and is anticipated to grow with a CAGR of more than 6.20% over the forecast period 2023-2030. A drive-in movie theatre is an outdoor entertainment venue where people can watch movies from the comfort of their cars. It typically consists of a large screen erected in an open field or parking lot and a designated area for vehicles to park facing the screen. The audio is transmitted through FM radio frequencies, allowing viewers to tune in and listen to the movie's sound through their car's speakers. Drive-in movie theatres offer a unique and nostalgic movie-watching experience, combining the convenience of staying in your vehicle with the excitement of a shared outdoor event. Moreover, growing media & entertainment industry and rising household disposable income anticipated as the growth drivers of this market. Furthermore, expansion in emerging market and growing urbanization shoot up the Global Drive in Movie Theater Market during the forecasted year 2023-2030.

According to the United Nations Population Fund (UNFPA) in 2022, urban expansion is rapidly increasing worldwide. The global population is expected to reach around 5 billion by 2030, with a majority already residing in urban areas. The continents of Africa and Asia are expected to witness significant urbanization, leading to substantial social, economic, and environmental transformations on a global scale. This growth primarily centers around the expansion of urban populations, highlighting the unprecedented

nature of this trend. According India Brand Equity Foundation (IBEF) in 2022, by 2026, it is anticipated that India's media and entertainment sector would be worth Rs. 4,30,401 crores (US\$ 53.99 billion). By 2024, it is anticipated that India's advertising revenue would total Rs 394 billion (about \$5.42 billion). With a 40% market share, television may be in the lead, followed by print media (13%), digital advertising (12%), films (9%), and OTT, and gaming sector (8%). However, limited location accessibility and changing weather condition may hamper the growth of the market.

The key regions considered for the Global Drive in Movie Theatre Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. Asia Pacific dominates the drive-in movie theatre market due to its large population, rapid urbanization, and growing middle class. The region's cultural significance, technological embrace, tourism appeal, and government support further contribute to its dominance. North America is the fastest-growing region in the drive-in movie theatre market due to several factors. The region's strong cultural presence and nostalgia associated with drive-in theatres have fueled their rapid growth. Additionally, the high disposable income of North American consumers, coupled with technological advancements in projection and audio systems, has contributed to the market's expansion. The region's favorable weather conditions, penchant for new entertainment trends, and the adaptability of drive-in theatres to host diverse events have further propelled their growth in North America.
