Abstracts

Global Driving Protection Gear Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than 5.5 % over the forecast period 2022-2028. Driving Protection Gear provides safety from road accidents. It includes helmets, armors, gloves, knee protection etc. These are available in natural fibers, synthetic and leather etc. The increasing incidences of road accidents led to the adoption of Driving Protection Gear across the forecast period. For Instance: According to the World Health Organization in 2020, road accidents are rising rapidly worldwide. Approximately 1.3 million people are dying every year because of road accidents. As per the same source, it is found that road traffic crashes caused a 3 % loss to the gross domestic product of the respective countries. Stringent government law pushes the market growth. Also, with the increasing adoption and sales of motorbikes, the adoption & demand for Driving Protection Gear is likely to increase the market growth during the forecast period. However, lack of public awareness impedes the growth of the market over the forecast period of 2022-2028.

The geographical regions considered for the global Driving Protection Gear market analysis include Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is considered as the significant region across the globe in terms of huge market share due to the growing millennial population, rising disposable income
