## **Abstracts**

Global Droppers Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Dropper refers to tiny glass or plastic tube along with a hollow rubber portion on the top through which one can draw and drop liquid in small quantities. Growing cosmetics industry and rising adoption of droppers in pharmaceuticals sector are key drivers for the growth of Droppers market. For instance, according to global database management company Statista- as of 2021, the revenue of the global cosmetics markets was estimated at USD 80.74 billion and the revenue is projected to generate USD 177 billion in 2025. As of 2020, the Asia-Pacific region accounted for approximately 43 percent of the global market. Furthermore, in March 2019, UK packaging supplier, Neville and More, has launched new Dropper Pipette that benefits the combination of both Child Resistance and Tamper Evidence. Moreover, in April 2021, Aptar Beauty & Home launched its new dropper solution called Star Drop. This

new solution comes with smart valve technology, which facilitates precise dose at each use. Also, with the increasing usage of droppers in laboratories and rising healthcare sector in emerging markets, the adoption & demand for Droppers is likely to increase the market growth during the forecast period. However, rising safety concern over use of plastic and disruption in supply chain due to covid 19 pandemic impedes the growth of the market over the forecast period of 2022-2028.
