Abstracts

Global Durian Powder Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028.

The Durian Powder can be defined as a tropical fruit identified by its large size and spiky, hard outer shell. It has a pungent smell, and custard-like flesh with large seeds. It largely grows in the Southeast Asian countries of Malaysia, Indonesia, and Thailand. To obtain powder, fresh durian is first freeze-dried and then ground into a powder for further application. Durian fruits are said to be rich in calcium, potassium and magnesium. The growing consumption of bakery & confectionery products and increasing awareness towards health benefits of durian as well as surging utilization of durian in various food products are factors that are accelerating the global market demand. For instance, as per Statista – as of 2022, revenue in worldwide Confectionery & Snacks segment valued at USD 1530 billion. The market is projected to grow by CAGR of 2.46% between 2022 & 2027 to reach to USD 1730 billion by end of 2027. Furthermore, different bakery & confectionery companies are coming up with innovative products in combination with durian powder. For instance, in August 2020, Mondelez International launched Cadbury dairy milk durian variant in Indonesia. Also, growing demand for flavoring agent in the food industry and increasing penetration of online sales channel are anticipated to act as a catalyzing factor for the market demand during

the forecast period. However, health risk associated with high sugar content of durian impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Durian Powder Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing utilization of durian in different food products and rising geriatric population in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as the region being largest cultivator of the durian fruit and increasing cross border trade in the region, would create lucrative growth prospects for the global Durian Powder Market across the Asia Pacific region.

Major market players included in this report are:
