## **Abstracts**

Global E-Pharmacy Market is valued approximately USD 60.43 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 13.84% over the forecast period 2021-2027. E-pharmacy (Electronic Pharmacy) market has seen a significant growth over recent years. With a frequent shift from doctors visit towards taking the prescription online, the market will tremendously grow in the near future.

Implementation of travel restrictions and ongoing COVID-19 regulations are factors contributing to the market growth. For instance: according to Worldometer, the number of Corona cases went up to 141,111 by April 2021 from 121,370 in March 2020.

However, improper diagnosis of patients and increasing illegal online medical stores impede the growth of the market over the forecast period of 2021-2027. Also, shift in the preference towards online services and increasing demand for e-prescriptions is likely to increase the growth of the market in the forecasting period.

The regional analysis of global E-Pharmacy market when considering for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World has led to the analysis that North America is a significant region across the world in terms of market share owing to increasing number of internet services. Whereas Asia Pacific is anticipated to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as growing demand for e-prescriptions would create lucrative growth prospects for the E-Pharmacy market across Asia-Pacific region.
