## **Abstracts**

Global Earplug Market is valued approximately USD 7.5 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 10.4 % over the forecast period 2020-2027. Earplugs are the piece of rubber, wax, or cotton wool that is placed in the ear as water, noise, or cold air protection. They cancel the noise outside, provide comfort and protect the ears against injury. These are best used by Earplugs may or may not be reusable and fit against the side of the head with the appropriate pad or cushion over the entire external ear including seal and lobe. It is expected that increased demand for Noise Reduction Rating (NRR) or noise cancellation devices will drive the demand for earplugs over the forecast period. As per Statista, Global sales of soundbar speakers are forecast to reach US\$ 7.54 billion by 2022, up by US\$ 3 billion from 2017. Growing awareness among the population regarding ear protection will boost earplugs industry growth. However, it is expected that a lack of awareness of the importance of earplugs in non-mature markets will hamper the earplugs market over the forecast period.

The regional analysis of global earplug market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share, as it accounts for nearly one-third of all global demand.
