Abstracts

Global Edible Oil Packaging Market is valued approximately XXX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XXX over the forecast period 2021-2027. With the expansion of food industry in all the sectors such as fruits and Vegetables, Poultry and Meat processing, Fisheries, Food retail, dairy industry, changing food habits, increasing demand for food with added preservative for longer shelf life are some factors driving the market. On the other hand, demand for ready-to-eat food has been increasing to cope with busy life schedule which is fueling edible oil packaging market. For instance, in 2019, Seara Alimentos launched Seara Rotisserie Fit, a low-calorie, low-sodium, preservative-free ready meals range made using fresh ingredients. The low-calorie range has six different flavor options, including one vegetarian. However, concerns regarding low tensile strength as compared to traditional plastic are projected to impede the growth of the market over the forecast period of 2021-2027. Also, government authorities for trade and commerce are favoring edible oil manufacturers, along with exporters by reducing the tariffs on export and import of oils, categorizing it under the essential consumable items which is likely to increase the market growth during the forecast period.

The regional analysis of global Edible Oil Packaging Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the leading region across the world in terms of market share owing to the large production of edible oil within the region. Whereas, Europe is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2021-2027. Factors such as increasing demand for edible oil packaging would create lucrative growth prospects for the Edible Oil Packaging Market across Asia-Pacific region.
